[Sustainable Mediterranean Construction. Land Culture, Research and Technology](#)

Activities of the Association and Magazine's goals

SMC is the magazine that gives voice to studies and researches conducted by the **Sustainable Mediterranean Construction Association** with the intent of contributing to the scientific and cultural debate on the environment and built areas in the Mediterranean basin with a view to expanding and disseminating knowledge of a cultural heritage that over the centuries has been the cradle of civilizations. Ease in communications and transportation, different cultures and ethnicities, different environmental conditions and local resources have enriched a large cultural luggage that quickly spread over the centuries by taking everywhere different features.

The Association is aimed at promoting and disseminating studies and projects to control the transformations of the territory within the Mediterranean basin as well as to promote the dissemination of research results by means of scientific activity.

The Association brings together different expertise in the various fields of engineering, architecture and geology that converge in the interest of pursuing sustainable choices in the development and recovery policies of the Mediterranean environmental heritage.

The title of the magazine, *Sustainable Mediterranean Construction. Land Culture, Research and Technology*, came from the will of a number of researchers who have been carrying on activities of studies for years in the sectors of land construction and re-qualification of the natural and anthropic environment. Therefore the Magazine wishes to be a toll for a scientific depth of sustainability for development, thus acquiring an interdisciplinary and multidisciplinary nature, besides the transcalarity of the various subjects. Italian as well as foreigner experts, through the SMC's pages, will promote and increase the international debate around the specific subjects of the Mediterranean habitat.

The contribution of any eventual interested author will be both by means of invitation and offering papers in the shape of essays, communications, interviews and critique examination of books, published both in the author's language and in English, and subjected to referee action by a specific Referee Commission chosen among a Panel of Italian and International experts.

The aim will hence be that of updating the various approaches and discovering the possible common ground on which the various expertise can in fact dialogue and interact, so as to provide more sensitive language and more careful techniques of construction, which will reduce the disadvantages of a deep footprint and serious impacts to both earth and man life.

Number NINE

The SMC Magazine, active as publication of international character since 2014, has reached its number 9. In particular from October the 31st, 2018 the Sustainable Mediterranean Construction" is included in the Italian ANVUR Scientific Journals. Thus the papers here published have the value of a journal publication for the ASN average grades, as well as includible into the VQR, the research assessment criteria.

Each issue, besides the general section on sustainable construction, includes a subject "Focus"; the already faced focuses were: Earth, Water, Air, Fire, Light, Greenergy, Sound and Matter.

In particular, in this new issue - the number 9, first of 2019-, by consolidating the tradition of recognizing the harmony between built landscape and natural environment, any paper will be hosted within the section on sustainable constructions in the Mediterranean, as general and usual subject, while the main Focus will be centered on the subject of: " **Green**". This title, which crosses transversally the multidisciplinary and multi-scaled subjects of the magazine, could be declined according to the following sub-topics:

1. *Vegetation and built environment*
2. *The role of vegetation for providing bioclimatic comfort in architecture*
3. *Survey and drawing of vegetation*
4. *Historical Centres and Green*
5. *Geology, vegetation and exceptional events*
6. *Green in the urban and peri-urban landscape*
7. *The role of green for psycho-social welfare*
8. *Trees: use and abuse*
9. *Recovering built and green environment*
10. *The role of green in the infrastructures' design*
11. *Vegetation reconstruction of soil*
12. *Use of vegetable materials for architecture, engineering and industrial design*
13. *Technologies for urban and peri-urban green regeneration*
14. *Green, built environment and anthropic security*
15. *Green and climate change*

Magazine main subjects, Construction technology, Material science, Survey and representation, Construction procedures and security, Urban planning, Land transformation and perception, History of architecture, Hydraulics, Geological impacts, Architectural and Engineering design, Energy saving, Structural and Technical physics, Industrial design and Legal studies, are all connected with the sustainable construction in the Mediterranean region.

All submitted papers will be assessed by the Editors Board, by the Steering Committee and the Scientific Committee and "double peer blindly" reviewed by an international panel of experts in the specific sectors. (For more information please contact us: smc.association@mail.com or cittam@unina.it).

The magazine will provide cultural exchange and information between researchers, professionals, scientists, engineers as far as the achievement in the field of their actions and studies are concerned.

Joined with the acceptance of the paper, the specific template, according to which the final version of the paper should be edited, will be communicated to authors.

DEADLINE for submission of abstracts: **January the 31st, 2019.**

DEADLINE for submission of Full Papers: **March the 6th, 2019.**

All the submitted papers must meet these requirements:

- should have the length up to 5 pages (and 20 000 characters space included) including the appendix and references (an extra cost for each additional page is previewed: 30 euros)
- should be written in both languages: English and the authors' language.
- should contain the following information: Title: max 80 characters (spaces included); Sub-title (optional): max 40 characters (spaces included); Author/s: Name, Family name, Affiliation, address, e-mail; Disciplinary or Cultural reference; an Abstract of 1500 characters (spaces included); Maximum length of paper: 20.000 ch in the author's language and 20.000 in English; Pages: maximum 5 at 80 € (Any additional page, extra cost of 30 €)
- in the final version, should use the template for printing, communicated to the authors after the acceptance by the Review Board.

Important deadline dates:

Authors' submission of abstracts	<i>January the 31st , 2019</i>
Editorial Board' acceptance of abstracts	<i>February the 6th , 2019</i>
Authors' registration and submission of full paper	<i>March the 6th, 2019</i>
Notification of acceptance (after the "double peer blind" review process)	<i>May the 30th, 2019</i>
Camera ready submission	<i>June the 15th, 2019</i>
Registration payment	<i>June the 15th, 2019</i>
Magazine previewed Publication	<i>July 2019</i>

The paper should be submitted to the following address, in both the formats "Word" and "Pdf":
smc.association@mail.com

Please contact us for any information at: smc.association@mail.com or cittam@unina.it
